ODE ITC Call – 6/12/23
Notes provided by Naja Bailey (META) and Gretchen Martin (ACCESS)

FY23 Grad Cohort Reports - ODE is working on updates to the Grad Cohort reports that will add flags around competency, readiness, and credits for the new graduation requirements for class of 2023. Updates to these reports should be out within the next couple of weeks.

FY23 Assessment Collections - A lot of assessment data has been released to districts. Districts should be submitting this data as soon as possible so they can see preliminary results in the SDC and review missing records.

Data Collections and Submissions - ODE is looking at LEAs who haven't submitted recently (or at all); trying to get ahead of this to reduce issues in July. There are about 5 weeks until a large number of collections close, and another 2 weeks for the additional collections to close.

OEDS and OH|ID Profile Updates - These updates went live last week. There are some issues with external applications; look for an announcement in Ed Connections. Something still needs to happen with ODDEX at some point, once they figure out why it's not working correctly with external applications that use OH|IDs - this is yet to come in the future (undetermined date).

Juneteenth – ODE will be closed Monday, June 19th for the holiday, but will be processing data as normal on this date.

Q&A

Q: Questions about OH|ID. I was renewing my license, which took me through OH|ID. I was surprised to get confirmation through my work email. Additionally, parents are submitting applications for scholarships through OH|ID. When I went through the profile update, I was asked to provide a personal email address, and also showed what email is currently connected to OH|ID. The current personal email is showing my work email. It appears OH|ID is treating my work email as my personal email. I'm concerned about entering my personal email.
A: A lot of this is the reason why these profiles were set up in the first place - to have individuals verify their profile information each year. Many of us have been dealing with ODE for many years. The way all applications and systems detail with emails has become more sophisticated over time. Part of this update is to ensure the appropriate email address is added for the correct place. It's possible only a single email address was collected when the account was originally set up, it's just rolled forward year after year, and that's all the information they have. That's why they're going through the whole profile process now - this is a chance to make this right. Additionally, as we add email functionality into the DC and ODDEX - one of the things we intend to do is show you what the system is providing as your email …but also give you the opportunity to indicate which email should be used for a particular purpose. Somewhere down the road, you may be able to indicate multiple emails and identify specific email addresses for specific applications. As far as entering personal email, it's really up to the individual. Regarding EMIS, they try to be as careful as possible with the hierarchy of email address. If the *only* email that is in OH|ID is a personal email, this is what ODE will use, but they do check the type of email and always go with the public/work email address as the first choice. Can't speak to which email will be used by other applications (ex. Data Quality).

Q: An existing ITC employee is not receiving any notifications from ODE for conference calls, notes, etc. What do we need to do to correct this? She previously was receiving the message (she's not new), but now she is not. The invites are no longer on her calendar.

A: As long as she is in the general EMIS Support email group that all ITCs have, she *should* be getting messages that are sent to your ITC.   If one of the invitations for the ODE or Change Call is forwarded to a new ITC person and they accept the invitation or respond to that email, this should also add them to the list. You can also send an email to the EMIS inbox, or David or Erica, and they will add them. For an existing staff, check with IT Staff at your ITC to ensure she's in the email group. Maybe the messages are going to SPAM or getting blocked for some reason.

Upcoming Call Schedule
Monday, June 26 – ODE ITC Call
